Frequently Asked Questions

Assembly of the Net (Step 1):

- Double check you have the '+' and '-' of the IR LED's properly positioned
- The right way to place the IR LEDs can be found in step 1a

Wiring the Game (Step 9):

- A summary wire map can be found on Page 4 of the manual
- Take your time and find the matching letters that show where each wire should go
- Start with the kicker side of the field:
 - Connect the shortest wires first, wires J and K
 - Then, connect wires I, F, and H. The last wire on the kicking side is labeled 'C' and this connects to letter C on the goalie side wall. (at 8:28 of instructional video)
 - All wires on the kicker side are now connected
- On the goalie side wall, start with the two blue wires; one is labeled wire A, the other is wire E.
- Then, finish with wires D, B, and G
- You are now finished wiring the goalie wall

If your field doesn't lay flat doesn't lay flat (Step 11)

- Double check that the wires behind the scoreboard are routed properly and are directly against the back wall of the game so they wires are not pushing on the scoreboard.
